

User Guide: AA-GGY Cabs

AAGGY Cabs is a taxi booking app that allows you to book a ride with ease. The app also allows the admin to manage taxis, drivers, customers, and rides.

Getting Started:

Open the AAGGY Cabs app.

You will be presented with a main menu, which has three options:

1. Admin
2. Login
3. Exit

Admin Login:

If you select the Admin option, you will be prompted to enter your username and password.

Enter your username and password to access the admin menu.

The admin menu has the following options:

1. View rides
2. View taxis
3. View customers
4. View drivers
5. Remove taxi
6. Remove driver
7. Add taxi
8. Add driver
9. Back to main menu

View Rides:

To view rides, select option 1 from the admin menu.

The app will display all the rides available.

View Taxis:

To view taxis, select option 2 from the admin menu.

The app will display all the taxis available.

View Customers:

To view customers, select option 3 from the admin menu.

The app will display all the customers.

View Drivers:

To view drivers, select option 4 from the admin menu.
The app will display all the drivers.

Remove Taxi:

To remove a taxi, select option 5 from the admin menu.
Enter the taxi number to be removed.
The app will remove the taxi from the list.

Remove Driver:

To remove a driver, select option 6 from the admin menu.
Enter the driver's name to be removed.
The app will remove the driver from the list.

Add Taxi:

To add a taxi, select option 7 from the admin menu.
Enter the taxi number, model, max passenger, register under, service date, and status.
The app will add the taxi to the list.

Add Driver:

To add a driver, select option 8 from the admin menu.
Enter the driver's first name, last name, age, gender, ratings, status, and license.
The app will add the driver to the list.

Login Menu:

After choosing the login option, you will be directed to the login menu which has three options:

Customer login: This option allows you to login as a customer to book rides.

Driver login: This option allows you to login as a driver to view ride requests and customer details.

Back to main menu: This option takes you back to the main menu.

Customer Menu:

After successfully logging in as a customer, you will be directed to the customer menu which has six options:

Book a ride: This option allows you to book a ride by providing details such as pickup and drop-off location and show the available drivers and cabs where the user can check which one is suited for him and book it.

Cancel current ride: This option allows you to cancel your current ride.

Check status of current ride: This option allows you to check the status of your Current Ride.

Make payment: This option allows you to make payment for your ride.

View previous rides: This option allows you to view your previous ride details

Back to main menu: This option takes you back to the main menu.

Driver Menu:

After successfully logging in as a driver, you will be directed to the driver menu which has four options:

View previous rides: This option allows you to view your previous ride details as a driver.

Check current ride request: This option allows you to check if there is any ride request for you.

View customer's current location: This option allows you to view the customer's Current Location.

Back to main menu: This option takes you back to the main menu.

Note: Some of the options may not be functional as the app is still in development.

Thank you for using the AAGGY Cabs app. We hope you have a pleasant experience.
